When schools reopen in August, after summer vacations, the Mohalla will once again take up the matter of the few remaining children not yet going to school or studying in sub-standard schools.

Apart from admissions, the Mohalla Team also worked on improving the quality of the AMM database. Like last year, the Gift Hamper Scheme was carried out at the time of Salgirah of Aqa Mola (TUS). At the same time the Mohalla Team has been working on identifying new children through the Ejamaat database.

This year, for the first time, the Mohalla Team will also follow-up on children who will appear in SSC exams next year. This activity will take place after August.

Our thanks to the AMM Education Team for the effort they have put in.
